Maximum number of sheets of 80 g/m² paper. The maximum capacity in this case is 50 sheets.

Tool with metal functional parts

Temporary stapling makes it easy to keep papers together for short periods. The advantage: staples can be removed quickly and easily.

For quick fastening: nailing.

Quantity and type of staple that can be used. In this case, 150 pieces 24/6 to 24/8.

Quantity and type of staple that can be used. In this case, 200 pieces of 26/6 to 26/8 staples.

Maximum paper insertion depth, in this case 90 mm.

The spring loading mechanism - by pressing a button at the rear of the stapler, the staple magazine is released for front loading.

With staple legs resting flat against the paper, flat-clinch stapling cuts filing space by as much as 30%. The minimum amount of space taken up by staple ends optimises binder capacity.

Novus offers a warranty of 25 years when handled in a proper manner.

The quality statement „German Engineering“ ensures that a product was developed according to German quality standards by our engineering experts. All Novus products carrying the „German Engineering by Novus“ signet are manufactured in our own plants around the world by our own workforce, managed and supervised by our headquarters in Germany.

This machine bears the GS approval of product safety.

Flat-Clinch stapler NOVUS B 5FC

With stapling legs resting flat against the paper, flat-clinch stapling cuts filling space by as much as 30 %.

The third method of Novus desktop staplers: nailing. With this method, the staple ends are not bent over but sunk vertically into the stapled object.

Flat-Clinch stapler NOVUS B 5FC

The moveable anvil also permits permanent and temporary stapling. Temporary stapling is ideal for short-term fastening. Advantage: easy, fast removal of staples.

With the new two-stage stapling action, the staple legs pierce the paper first. The staple ends are then bent over and pressed absolutely flat against the paper.
